

Aljazi Ali Almuhammad IT & Cybersecurity

+973 3438 9145 aljaziali04@gmail.com AljaziAlmuhammad@LinkedIn github.com/AljaziAlmuhammad
AljaziPortfolio Muharraq, Bahrain

Cybersecurity graduate from the University of Bahrain with hands-on experience in secure software development, Linux systems, web applications, and technology-driven projects. Developed multiple academic projects, including ShellSentry, an AI-powered platform for secure Linux command validation and remote server management. Currently gaining practical experience through an IT internship at the Ministry of Interior. Skilled in Python, Java, Linux, and problem-solving, with a strong interest in IT infrastructure, cybersecurity, and emerging technologies.

EDUCATION

09/2022 – 08/2026	Bachelor of Cybersecurity University of Bahrain	Zallaq , Bahrain
09/2019 – 06/2022	High School Certificate Hidd Secondary Girls School	Muharraq , Bahrain

LANGUAGES

Arabic English

TECHNICAL SKILLS

- Python	- Java	- HTML/CSS	- Linux
- GitHub	- Risk Assessment	- Threat Modeling	- Secure Software Development
- Bash	- SSH	- Database Management	- Network Fundamentals
- Communication	- Teamwork	- Leadership	- Problem Solving

PROFESSIONAL EXPERIENCE

06/2026 – 08/2026	Ministry of Interior Information Technology Intern	Bahrain
- Assisted in administrative and operational tasks within a governmental environment - Supported the organization, review, and management of official documents and records - Gained exposure to professional procedures, compliance standards, and workplace regulations - Assisted in preparing, formatting, and handling official correspondence and reports - Developed strong attention to detail, organizational skills, and understanding of formal workflows		

PROJECTS

09/2025 – 04/2026	ShellSentry – Secure Natural Language to Bash Execution Platform Team of 2	- Developed a secure AI-assisted platform that converts natural language requests into validated Bash commands for remote Linux systems. - Implemented multi-layer security controls, including command validation, authenticated execution, audit logging, and read-only enforcement, to prevent unsafe operations. - Integrated RAG, host-aware command generation, and SSH-based multi-server orchestration to improve command accuracy and operational efficiency. - Built the platform using Flask, Python, Paramiko, FAISS, and an OpenAI-compatible LLM, and evaluated it through functional, security, and performance testing.
04/2026 – 05/2026	Meridian FinTech Solutions – Cybersecurity Risk Management Plan Team of 5	- Conducted cybersecurity risk assessments for a cloud-based fintech environment using NIST and ISO 27001 methodologies. - Identified critical threats and developed mitigation, business continuity, and disaster recovery strategies. - Evaluated regulatory compliance requirements including PCI DSS, GDPR, and AML standards.
04/2026 – 04/2026	SijilChain – Blockchain Vehicle History Verification System Team of 3	- Designed a blockchain-based DApp to improve transparency in the used-car market by providing a complete vehicle history linked to the VIN. - Analyzed vehicle registration and accident-record processes to identify transparency and fraud-related issues. - Developed the system workflow, stakeholder requirements, and VIN-based record tracking concept. - Proposed secure OTP-based access and immutable blockchain storage for vehicle lifecycle records.
11/2025 – 12/2025	Tesla IT Audit Plan & Audit Program Team of 4	- Developed a risk-based IT audit plan to assess Tesla's critical technology systems and cybersecurity controls.

- Performed risk assessments and prioritized audit areas, including vehicle software, AI, cloud infrastructure, and data privacy.
- Designed audit procedures and recommendations to improve security, compliance, and operational resilience.

11/2025 – 12/2025	Cyber Attack Simulation Platform Team of 3 - Designed a secure cyber range platform for simulating cyberattacks and defense strategies in a controlled environment. - Developed system architecture, security requirements, and attack simulation workflows using SQUARE and STRIDE methodologies. - Created design models and Figma prototypes for user authentication, simulation management, and reporting features.
04/2025 – 05/2025	Multithreaded Flight Information Client-Server System Team of 2 - Developed a Python-based multithreaded client-server application for retrieving real-time flight information through the Aviationstack API. - Implemented SSL/TLS-secured socket communication, concurrent client handling, and JSON data processing. - Integrated API-based flight tracking features including arrival status, delays, and detailed flight information.
04/2024 – 05/2024	Telemedicine Platform Team of 4 - Planned a telemedicine platform to enable remote patient-doctor consultations and improve healthcare accessibility. - Developed project documentation, stakeholder analysis, scheduling, and risk management plans. - Created WBS, Gantt charts, cost estimates, and implementation roadmaps to support project execution.
04/2025 – 05/2025	Smart Vault – Secure Smart Postbox System Team of 4 - Designed a smart delivery vault to secure package deliveries using PIN and QR-based access control. - Developed the MVP, mobile app workflows, and real-time delivery tracking features. - Conducted market analysis and user validation to improve the solution and business model.
11/2023 – 12/2023	Travel Agency Database Management System Team of 4 - Designed a normalized relational database for managing travel packages, bookings, flights, hotels, customers, and car rentals. - Created ER/EER diagrams and resolved database connection traps. - Implemented SQL tables with relationships, constraints, and sample data.

CERTIFICATES

05/2026	Participation Certificate- StartUp Bahrain University of Bahrain <i>StartUp Bahrain</i>
11/2025	Participation Certificate- AI Game Day <i>Royal Academy of Police & Information & eGovernment Authority</i>
08/2025	Participation Certificate - The Transformative Power of Artificial Intelligence in Entrepreneurship <i>Youth City 2030</i>
06/2025	HSI Adult First Aid CPR AED Certification <i>Sinyar Emergency</i>
06/2022	Third Place – Sh. Fadyah Alsaad Science Competition (STEAM) <i>Sh. Fadyah Alsaad Science Competition (Arab Level)</i>
05/2015	First Place – Gold Category, Scientific Research Forum Competition <i>Scientific Research Forum Competition</i>

COURSES

Introduction to Cybersecurity Tools & Cyberattacks - IBM Coursera	Secure Software Development - Coursera	Cyber Security Safety Online Awareness - OPS Cyber Academy – NCSC Training Program
---	--	--

ORGANISATIONS

11/2025 – 11/2025	The Arab International Cybersecurity Conference and Exhibition (AICS) <i>Organizer in University of Bahrain workshop</i>	Zallaq , Bahrain
10/2025 – 10/2025	Bahrain Asian Youth Games (BAYG 2025) <i>IT Support Team Member</i>	Zallaq , Bahrain
07/2024 – 08/2024	Youth City 2030 - Ushers Committee <i>Organizer in Ushers Committee</i>	Zallaq , Bahrain
